1. Purpose

The purpose of this SOP is to ensure that all equipment is properly maintained to ensure optimal performance, prevent equipment failure, and minimize downtime.

2. Scope

This SOP applies to all equipment used in the production process, including but not limited to:

2.1 Machinery and equipment used in production, packaging, and quality control

2.2 Laboratory equipment

2.3 HVAC systems

3. References

3.1 ISO 22716, "Quality management systems - Requirements with guidance for use"

3.2 FDA 21 CFR Part 820, "Quality System Regulation"

3.3 Local, state, and national regulations regarding equipment maintenance

3.4 Out of Service Tag

3.5 Equipment maintenance request form document 5.6.10

4. Responsibility

4.1 The Production Manager is responsible for ensuring compliance with this SOP and for coordinating equipment maintenance activities.

4.2 All personnel involved in equipment maintenance are responsible for following the procedures outlined in this SOP.

5. Definitions

5.1 Equipment maintenance: The process of performing routine tasks to ensure that equipment is in good working condition and to prevent equipment failure.

5.2 Preventive maintenance: Maintenance performed to prevent equipment failure or to extend the life of the equipment.

5.3 Corrective maintenance: Maintenance performed to repair or replace equipment that has failed or is malfunctioning.

6. Procedures

6.1 Scheduling

6.1.1 Schedule equipment maintenance activities according to the equipment's maintenance schedule.

6.1.2 Verify that all necessary personnel and equipment are available for the maintenance activity.

6.2 Preventive Maintenance

6.2.1 Perform routine cleaning and sanitizing of equipment according to the manufacturer's instructions.

6.2.2 Check and replace worn or damaged parts according to the manufacturer's instructions.

6.2.3 Perform routine lubrication of piston fillers before use by applying vitamin E around the edges of the o-ring in the seal. See Work Instruction Piston Filer 5.6.8-1

6.2.4 Perform routine lubrication and greasing of equipment according to the manufacturer's instructions for the tube machine. See the Equipment Maintenance Schedule (need document number)

6.3 Corrective Maintenance

6.3.1 Corrective maintenance has been identified using the equipment maintenance request form document 5.6.10.

6.3.2 Identify the cause of the equipment failure or malfunction. Use the 5 W's to assist in determining the root cause of failure if necessary

6.3.3 Production managers perform repairs or replacement of faulty parts according to the manufacturer's instructions.

6.3.4 Verify that the equipment is functioning properly before releasing it back into production.

6.3.5 If the machinery can not be repaired in a timely manner an out service tag will be placed on the equipment and the equipment will be stored in an area that does not interfere with production until repairs are completed.

6.3.6 For equipment that cannot be easily moved they will be identified and prevented from being used by the use of the out of service tag

6.4 Record Keeping

6.4.1 Record all equipment maintenance activities, including dates, times, and personnel involved.

6.4.2 Document any issues or problems encountered during maintenance activities.

6.4.3 Review and update maintenance records regularly to ensure compliance with regulatory requirements.

7. Internal Audits

7.1 The QA Manager conducts periodic reviews of SOP Equipment Maintenance compliance to ensure effectiveness and identify areas for improvement.
